**Internet
Pharmacy Technician Training**

Pharmacy Technician Training Course

General Information

Pharmacy Technicians work in community and hospital pharmacies, assisting pharmacists in handling medications and serving patients.

The course provides an overview of skills and knowledge required to function successfully as a pharmacy technician. The course may be used by individuals working in retail or hospital pharmacy to prepare for the PTCB exam or to improve their job skills. The course can also be used by CPhTs to fulfill continuing education requirements.

The course will be taught entirely over the internet, and includes handouts, worksheets, homework assignments, approximately 40 contact hours and exams. This is NOT a correspondence course which you complete at your own pace. Instead, students are expected to complete weekly course assignments and progress through the course as a group. The weekly schedule and assignments help students keep up with the materials and successfully complete the course. The advantage of an internet course is that you can complete assignments and attend lectures at your convenience during the week. If you "miss" something or would like to hear it again, you just replay the presentation.

Information and a sample lecture which describes the course can be found at our course website:

<http://www.iPharmTech.com>

Faculty

The faculty includes pharmacists from the First District Pharmaceutical Association and Northeast Tennessee Society of Health-System Pharmacists.

The course director is:

- Peter J. Rice, Pharm.D., Ph.D., BCPS
Professor of Clinical Pharmacy and Associate Dean
University of Colorado Denver School of Pharmacy
and
Professor of Pharmacology, Emeritus
East Tennessee State University

Other faculty include:

- Cathy P. Creger, D.Ph., community pharmacist
- Jim McMackin, Pharm.D, long term care pharmacist
- Terri M. Stiles, D.Ph., hospital pharmacist
- Alan B. Corley, D.Ph., community pharmacist

Cost

The cost for the course is \$250 and includes single-user unlimited use of the course materials for six months. For two or more individuals registering at the same time, or individuals from the same pharmacy, the fee is \$200.

Course materials will be available prior to each starting date for those who are registered and want to get an early start.

Students will be notified by e-mail or phone when their registration is processed with instructions on how to access the course. Information will also be posted on our web site.

Cancellation and Refund Policy

Students are encouraged to access the first week of course materials prior to registering for the course. Refunds will not be given. By registering, students indicate that they understand and agree to this refund policy.

Topics

- Role of Pharmacy Technicians
- Pharmacy Calculations
- Pharmacy Law
- Interpretation of Medication Orders
- Sterile and Nonsterile Compounding
- Drug Classification

What is the Course Like ?

- visit our internet site at <http://www.iPharmTech.com>
- learn more about the course
- view the sample lecture
- still have questions ? send an e-mail to: info@iPharmTech.com

Pharmacy Tech Certification Exam

The PTCB exam is now offered on a continuous testing basis at sites across the US. Students can register for the PTCB at any time and are given 90 days to complete the exam. Those passing the examination are nationally certified as pharmacy technicians. Individuals taking the PTCB examination must have a high school diploma or GED and not have been convicted of a felony. The PTCB exam is separate and independent of this course, and costs \$129. Information and registration materials for the examination are available at the PTCB internet site: <http://www.ptcb.org>

iPharmTech Pharmacy Technician Training Course REGISTRATION

Please include me in the course as a:

- Single registration \$250 each
- Multiple registrations \$200 each
(two or more individuals registering at the same time)
